Portion Dispensing Systems

... because every ounce counts

Standard pourers available in 7 category while Fast-Flow pourers are available in 15 category.

Fast-Flow pourers pour approximately 30% faster than standard pourers. All pourers are compatible with USC SPIRIT and most ring type liquor control systems.

C3-Builder software for programming

- Create and export product list
- Edit multiple items with the multi properties function
- Create and edit users
- Backup and restore complete configurations

Interface with POS systems using industry standard LDS protocol.

- Unit sends embedded PLUs for each portion poured and waits for acknowledgement from the POS or ECR.
- Sales will instantly register on your compatible ECR or POS as you pour.

Connect to industry standard serial printers for reporting portions and sales dollars poured by line.

- X & Z Reports accessible using front panel keypad.
- Reports can be reset.
